

RICHMOND GENERAL CONTRACTING LLC

# COMPANY PROFILE

[www.richmondgc.com](http://www.richmondgc.com)

# About Us

Richmond General Contracting L.L.C. is a leading contracting company based in Abu Dhabi, United Arab Emirates, providing comprehensive building contracting and maintenance services for residential, commercial, and industrial projects.

Established in 2009, Richmond General Contracting has consistently delivered high-quality projects by adhering to international engineering and construction standards.

Our team of professional experts ensures that every project is completed with efficiency, safety, and attention to detail, providing clients with innovative solutions tailored to their requirements.

# VISION & MISSION

## VISION

To be recongized as a reliable, technically capable, and coordinated contractor delivering high quality commercial and industrial projects across the UAE.

## MISSION

To execute entrusted projects with professionalism and integrity, supported by a skilled and dedicated workforce focused on client satisfaction while utilizing the latest quality standards to meet the evolving needs of the construction industry.

# LEGAL & REGULATORY COMPLIANCE

Richmond General Contracting L.L.C. maintains full compliance with UAE regulatory and authority requirements. The company holds an active trade license and is registered with all relevant Abu Dhabi and federal entities, including Abu Dhabi Municipality, Civil Defense, and utility authorities. Richmond adheres to contractual obligations under FIDIC-based frameworks and ensures proper documentation, permitting, inspections, and certifications throughout each project. Our operations follow structured administrative procedures supported by documented QA/QC protocols, material submittal workflows, and compliance with authority codes.

The company maintains standard contractor insurance coverage including Contractors All Risk (CAR), Workmen's Compensation, and Public Liability, ensuring risk mitigation and safe project delivery.

# ORGANIZATIONAL STRUCTURE

Richmond operates under a clear and organized reporting structure designed to support efficient communication, technical clarity, and coordinated decision-making. The General Manager oversees all strategic functions, while the Operations Manager directs project resources, scheduling, and procurement workflows.

Project Managers supervise day-to-day execution, liaising closely with consultants and clients. QA/QC and HSE departments operate independently to ensure compliance, inspections, and safe work environments. Site Engineers and Supervisors manage daily operations, workforce coordination, and technical implementation on site

# MANAGEMENT PROFILES LEADERSHIP TEAM

## GENERAL MANAGER

Provides strategic leadership, ensures compliance with company objectives, oversees contractual commitments, and maintains relationships with clients, consultants, and regulatory authorities. Guides high-level decision-making and ensures that all operational units perform in alignment with company standards.

## OPERATIONS MANAGER

Responsible for resource allocation, project scheduling, procurement coordination, and operational planning. Ensures projects receive the required manpower, materials, and logistical support. Coordinates between management, site teams, and supply chains.

## PROJECT MANAGER

Leads project execution from start to completion. Manages client communication, coordinates technical reviews, oversees construction progress, and ensures adherence to drawings, specifications, QA/QC requirements, and safety protocols while maintaining project

# MANAGEMENT PROFILES TECHNICAL TEAM

## QA/QC ENGINEER

Ensures that all construction activities meet the required quality standards, reviews method statements, conducts inspections, verifies material compliance, and coordinates with consultants for approvals. Implements testing procedures and documentation protocols.

## HSE OFFICER

Implements site safety plans, conducts toolbox talks, monitors risk mitigation measures, ensures regulatory compliance with UAE safety standards, and promotes a safe working environment for all site personnel.

## SITE ENGINEERS / SUPERVISORS

Oversee daily construction activities, coordinate subcontractors, ensure work is carried out according to approved drawings, manage site logistics, and support the Project Manager in technical execution and progress reporting.

# GENERAL CONTRACTING

Complete civil, structural, and architectural execution services

Richmond provides comprehensive general contracting services covering all major disciplines required for commercial, industrial, and mixed-use buildings. Our teams manage reinforced concrete works, steel integration, block and plaster systems, waterproofing, external works, and architectural finishes. We coordinate closely with consultants, suppliers, and authorities to ensure all activities comply with approved drawings, method statements, and project specifications. Our structured supervision and planning practices ensure predictable progress, controlled material flows, and adherence to quality and safety standards across every stage of construction.

# STEEL STRUCTURE BUILDINGS

Fabrication, erection, and integration of structural steel systems

Richmond executes full steel structure packages including fabrication coordination, on-site erection, anchor bolt alignment, bracing installation, and structural integration with concrete and façade systems. Our teams understand the technical requirements of industrial sheds, showrooms, mezzanines, and hybrid steel–concrete structures. We emphasize erection accuracy, mill tolerance checks, torquing procedures, and safe lifting operations, ensuring stable structural performance and seamless interface with composite decking, cladding, and mechanical services.

# COMPOSITE FLOORING SYSTEMS

Metal decking, connectors, and composite slab construction

We specialize in composite flooring systems commonly used in commercial and industrial developments. Richmond manages metal deck installation, shear stud welding coordination, reinforcement placement, and concrete pouring sequences. Our execution ensures structural continuity between steel beams and concrete slabs while maintaining safety, levelness, and compliance with consultant-approved procedures. We coordinate closely with steel fabricators, decking suppliers, and post-concrete trades to deliver durable, high-performance composite floors.

# POST-TENSIONED STRUCTURES

## Execution and Coordination of PT systems

Richmond executes post-tensioned slabs in collaboration with certified PT system providers. We manage tendon layout verification, stressing operations, anchorage protection, and concrete placement sequences according to approved method statements. Our approach ensures accurate tendon profiles, controlled stressing operations, and full compliance with structural safety requirements. We work closely with consultants to ensure test reports, stressing logs, and inspection approvals are properly documented and submitted.

# PRECAST BUILDING SYSTEMS

## Installation of Precast Systems

Richmond coordinates and installs precast concrete elements including walls, columns, beams, staircases, and hollow-core slabs. Our teams handle lifting, temporary bracing, grouting, and structural stitching to ensure alignment and load transfer integrity. We work with precast suppliers to verify shop drawings, lifting points, connection details, and on-site tolerances. The result is a rapid, controlled, and structurally consistent installation suited for commercial and industrial projects requiring fast-track execution.

# RESIDENTIAL & COMMERCIAL BUILDINGS

Construction of villas, retail unit, and low-rise commercial developments

Richmond executes residential and commercial buildings with strong focus on structural quality, architectural finishes, and coordinated MEP integration. Our experience includes villas, retail strips, showrooms, mezzanine offices, and multi-use commercial spaces. We ensure clear sequencing between civil works, block partitions, waterproofing, façade systems, and interior finishes. Through disciplined supervision and consultant coordination, we deliver functional, aesthetically finished spaces aligned with client and authority requirements.

# CURTAIN WALL & FACADE COORDINATION

Integration and alignment of facade systems with structural elements

Richmond provides structural coordination and site supervision for curtain wall, aluminum, and glazing systems. We ensure correct interface preparation, bracket installation, tolerance alignment, and weatherproofing coordination between façade systems and the primary structural frame. Our role includes coordinating with façade subcontractors, verifying shop drawings against structural elements, and ensuring the façade installation aligns with the architectural intent while meeting performance and safety standards.

# INDUSTRIAL & WORKSHOP FACILITIES

Construction of Showrooms, workshops, and specialized industrial spaces.

Richmond has extensive experience in constructing industrial spaces including car showrooms, vehicle workshops, storage facilities, and mixed-use industrial buildings. Our scope typically includes steel structures, composite floors, service trenches, waterproofing, drainage coordination, façade systems, and external works. We ensure functional operation layouts by coordinating with MEP designers, equipment vendors, and authority requirements for ventilation, fire safety, and access provisions.

# PROJECT MANAGEMENT

Planning, coordination, and controlled project execution

Richmond provides structured project management services embedded within every project we execute. This includes pre-construction planning, program development, procurement sequencing, authority coordination, QA/QC management, risk identification, HSE implementation, and progress reporting. Our approach ensures projects move forward with clear communication, documented procedures, and disciplined supervision, allowing clients to rely on stable and predictable outcomes throughout execution.

# PROJECT METHODOLOGY

Richmond follows a structured project methodology that begins with detailed pre-construction planning. This includes the review of IFC drawings, coordination of shop drawings and material submittals, and the development of procurement schedules aligned with the project program. Our team ensures early identification of technical risks, authority requirements, and logistical constraints. Mobilization plans, workflow sequencing, and coordination frameworks are prepared in collaboration with consultants to establish a clear execution strategy. During execution, Richmond implements disciplined supervision, quality inspections, material verification, and strict adherence to approved method statements. Our QA/QC team monitors workmanship, testing requirements, and compliance with specifications, while the HSE team enforces safety controls and risk mitigation procedures. Progress is continuously tracked against the program, and coordination meetings address technical and logistical issues. Final stages include testing and commissioning, preparation of as-built documentation, and structured handover to ensure full project close-out.

# EQUIPMENT & RESOURCES

Richmond maintains access to a wide range of construction equipment including scaffolding systems, lifting equipment, concrete tools, formwork components, steel handling machinery, and general site equipment required for commercial and industrial construction. Our core manpower includes skilled tradesmen, site supervisors, steel erectors, carpenters, masons, and technicians capable of supporting reinforced concrete, steel structure, and composite floor installation works.

To ensure project continuity, Richmond supplements its in-house workforce with approved specialist subcontractors for activities such as post-tensioning, precast installation, façade works, and MEP systems. Resources are assigned through structured planning based on project milestones and procurement schedules. This scalable resource model allows Richmond to meet project demands while ensuring consistent quality, safety, and progress across all site operations.

# CLIENTS & CONSULTANTS

Richmond has delivered projects for a range of private clients, commercial operators, and industrial businesses. Our collaborations extend to recognized engineering consultants across the UAE, supporting the delivery of commercial buildings, workshops, showrooms, and mixed-use facilities. A detailed list of completed and ongoing clients/consultants can be added here once final information is provided.

# OUR SERVICES

01 Mechanical, Electrical & Plumbing Contracting

02 HVAC Systems Installation & Maintenance

03 Plumbing & Drainage Systems

04 Fire Fighting & Fire Alarm Systems

05 Building Management System & Automation

06 ELV (Extra Low Voltage) Systems

07 Testing, Commissioning & Maintenance

08 Design & Build Solutions

09 Energy Efficiency & Sustainability Solutions

10 MEP & Engineering Services

# MEP & Engineering Services

Richmond General Contracting, we deliver reliable and efficient MEP and engineering solutions that form the backbone of modern buildings and infrastructure.

Our services cover every stage from design and installation to testing, commissioning, and long term maintenance ensuring complete functionality, safety, and sustainability for every project.

# Mechanical, Electrical & Plumbing (MEP) Contracting

Richmond General Contracting offers comprehensive MEP contracting solutions for residential, commercial, and industrial projects.

Our scope includes the design, installation, and commissioning of mechanical, electrical, and plumbing systems with seamless integration across disciplines.

We strictly follow ADDC, ADM, and Civil Defense standards to ensure safety and compliance. Through efficient project coordination, we deliver high performance systems and timely project completion.

# HVAC Systems Installation & Maintenance

We specialize in the design and execution of Heating, Ventilation, and Air Conditioning (HVAC) systems optimized for the UAE's climate.

Our expertise covers chilled water systems, ducted units, VRF/VRV systems, and ventilation networks.

Every installation prioritizes comfort, indoor air quality, and energy efficiency.

Richmond also offers preventive maintenance services to ensure long-lasting system reliability.

# Plumbing & Drainage Systems

Richmond delivers efficient and sustainable plumbing and drainage installations for buildings of all sizes.

We manage water supply networks, sanitary systems, and stormwater drainage using high quality materials and techniques.

Our team ensures leak proof performance, hygienic design, and adherence to plumbing regulations.

Comprehensive maintenance support is available to extend system life and performance.

# Fire Fighting & Fire Alarm Systems

Safety and compliance are at the heart of our operations. Richmond provides complete fire protection systems including sprinklers, hydrants, hose reels, fire pumps, and alarm systems.

Our installations are designed and tested according to UAE Civil Defense and NFPA standards.

We ensure rapid detection, effective suppression, and system reliability for total building safety.

# Building Management System (BMS) & Automation

We integrate intelligent Building Management and Automation Systems to help clients monitor and optimize energy usage.

Our solutions connect HVAC, lighting, power, and security systems into a unified platform for centralized control.

Richmond's automation services enhance operational efficiency, reduce energy costs, and support sustainability objectives using cutting edge technologies.

# ELV (Extra Low Voltage) Systems

Richmond offers design, supply, and installation of ELV systems such as CCTV, access control, structured cabling, PA/BGM, and intercom systems.

These systems improve building communication, safety, and control.

Our ELV solutions are scalable, secure, and fully integrated with BMS and IT infrastructure providing a smart, connected, and future ready environment.

# Testing, Commissioning & Maintenance

Our engineering team ensures every system operates according to its design intent through detailed testing and commissioning procedures.

Using advanced testing tools, we verify all parameters for safety, efficiency, and reliability.

Richmond also provides preventive and corrective maintenance services with tailored contracts, ensuring optimal performance and minimal downtime throughout the facility's lifecycle.

# Design & Build Solutions

Richmond General Contracting offers a streamlined design and build approach for MEP systems.

Our engineers manage the complete process from concept design and 3D modeling to on site execution.

This integrated approach eliminates coordination gaps, ensures cost control, and accelerates project delivery all while maintaining the highest quality standards and client satisfaction.

# **Energy Efficiency & Sustainability Solutions**

As part of our commitment to environmental responsibility, Richmond provides energy audits, retrofitting, and green building consultancy.

We focus on optimizing HVAC and electrical systems to reduce energy consumption and carbon footprint.

Our team supports clients in achieving LEED, Estidama, and other sustainability certifications through innovative and cost effective solutions.
